

CAR CONCIERGE

The Operating System for Vehicle Ownership

From an idea about daily car cleaning to a vision for managing the complete vehicle lifecycle.

Vision deck · July 2026 · For friends, mentors & early advisors

THE ORIGIN · 2019

Where it all started

In 2019, I explored a simple idea: **a professional daily car cleaning service** for gated societies — trained cleaners, standard processes, an app to run it all.

The idea never took off. But while exploring the market, something became impossible to ignore: cleaning was only the first of many pain points a car owner juggles.

The real discovery wasn't a business. It was a problem worth solving: owning a vehicle is far harder than it should be.

2019 — An idea

Daily car cleaning, done professionally.

The realization

Cleaning is just one of twelve problems owners face.

2026 — The vision

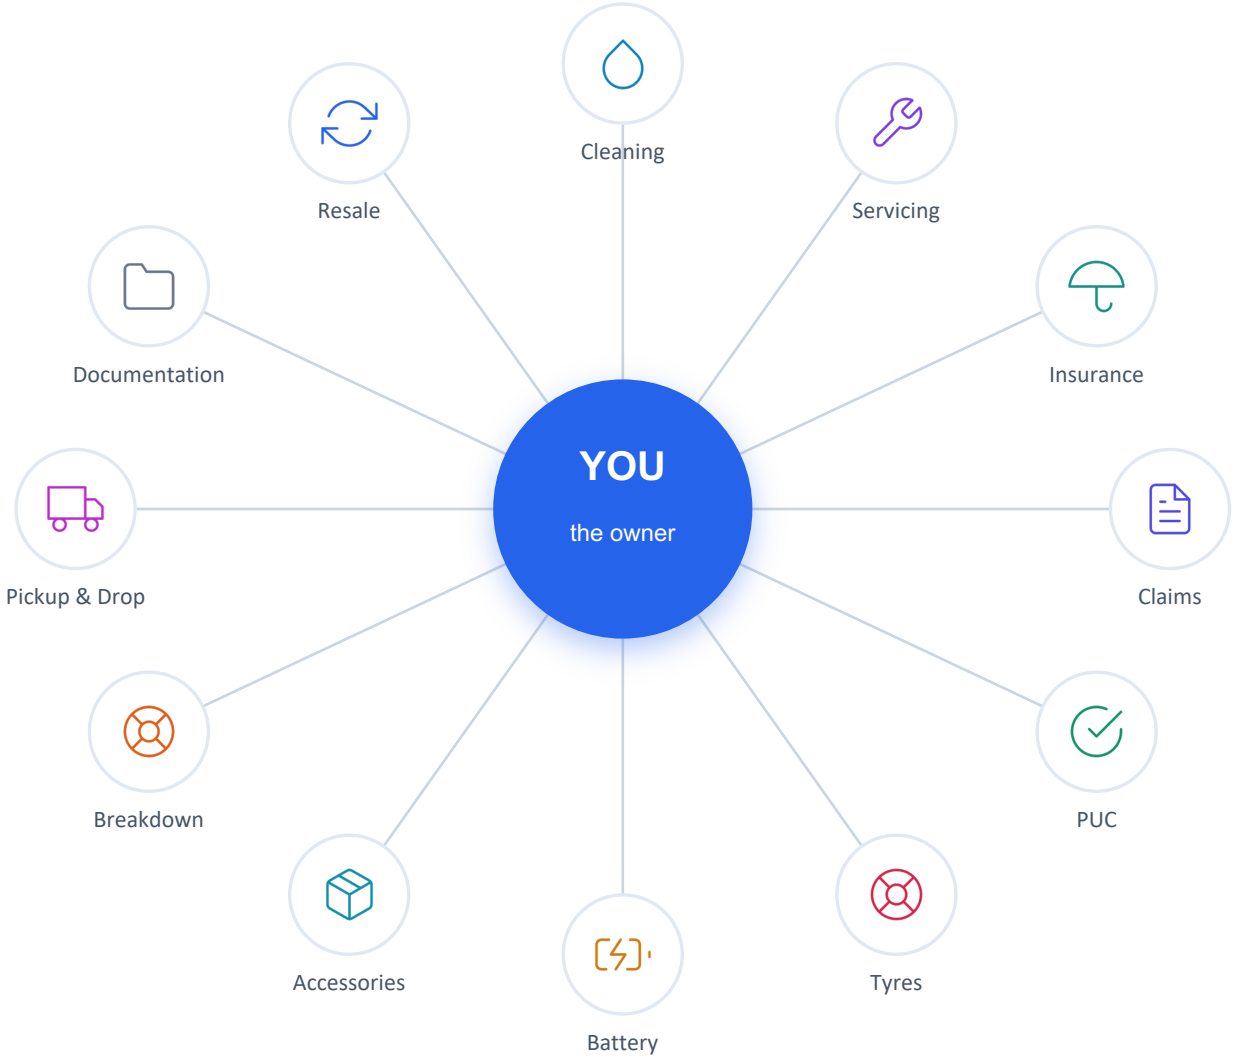

Car Concierge: one partner for the entire ownership journey.

THE REAL PROBLEM

Vehicle ownership is fragmented.

Twelve different vendors. Twelve apps, phone numbers and invoices. No one accountable for the whole experience.

Every relationship starts from zero. Every problem is someone else's problem.

THE BIG QUESTION

What if one trusted company managed everything around your vehicle?

Not twelve vendors. One relationship.

INTRODUCING

Car Concierge

Every service your vehicle will ever need — handled by a single partner, for as long as you own it.

One App

Every service, every record, every reminder — one intelligent interface for your vehicle.

One Subscription

A single monthly plan that covers care today and unlocks everything else tomorrow.

One Trusted Partner

A relationship that spans the entire journey — from the day you buy to the day you sell.

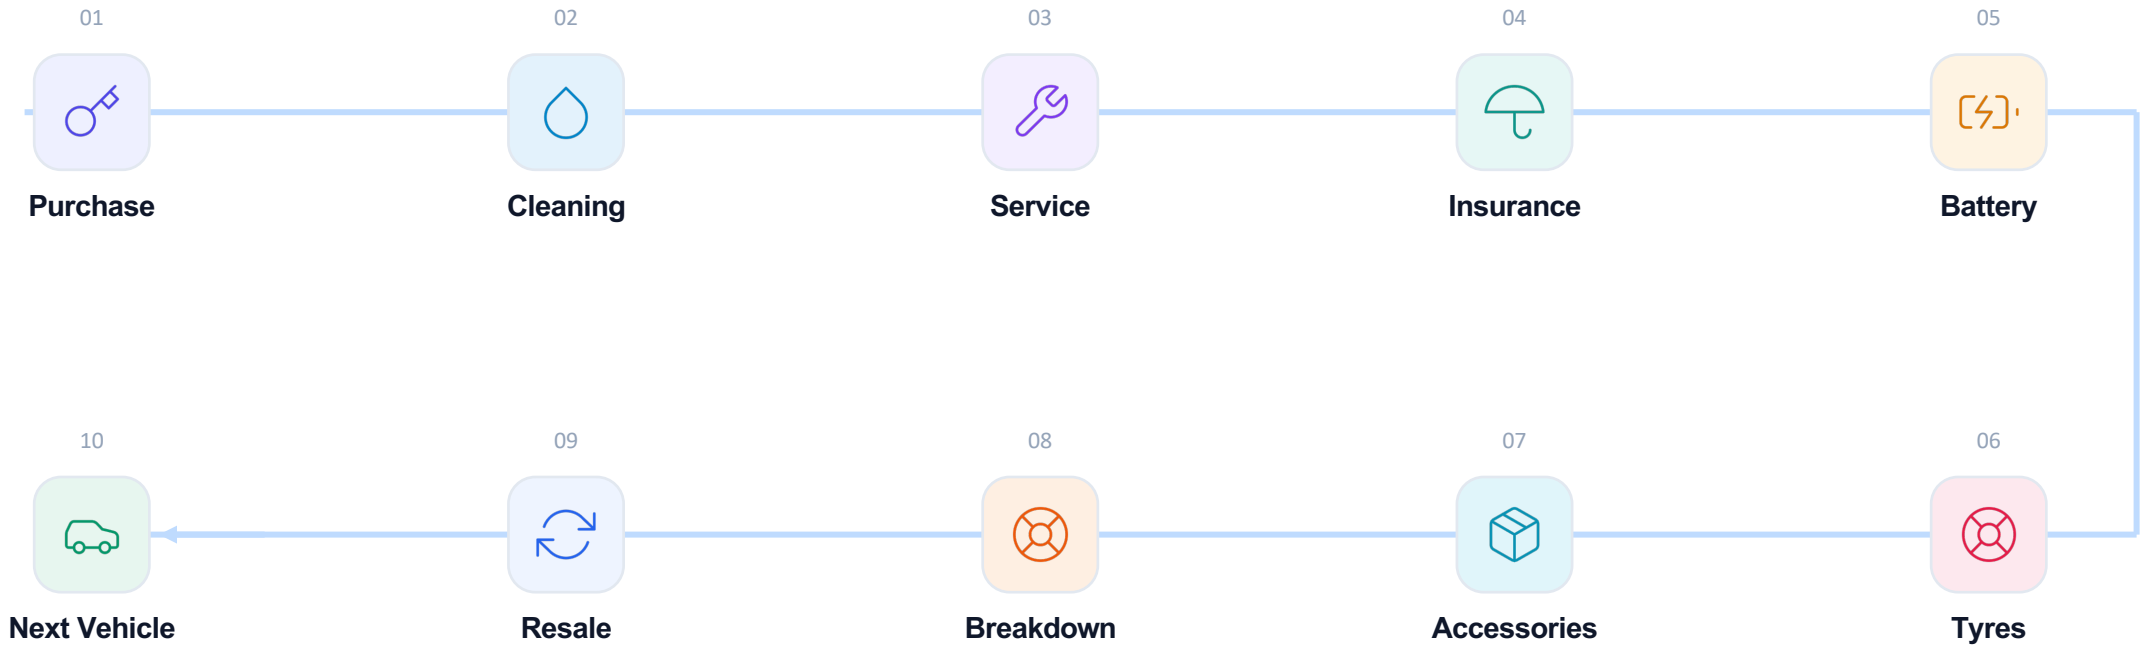

The Car Concierge app — one home for your vehicle

THE JOURNEY

One journey. One partner.

Car Concierge is present at every stage of ownership — from the day you buy to the day you upgrade.

The journey repeats — and Car Concierge is there for every lap.

THE WEDGE

Why start with daily cleaning?

365 touchpoints a year. No other vehicle service comes close.

High engagement

A daily habit that keeps the brand in sight every morning.

Trust

Consistent quality earns the right to handle bigger things.

Recurring revenue

Predictable subscription income from day one.

Physical presence

Teams on the ground in every society, every day.

Relationships

Every interaction opens the door to the full platform.

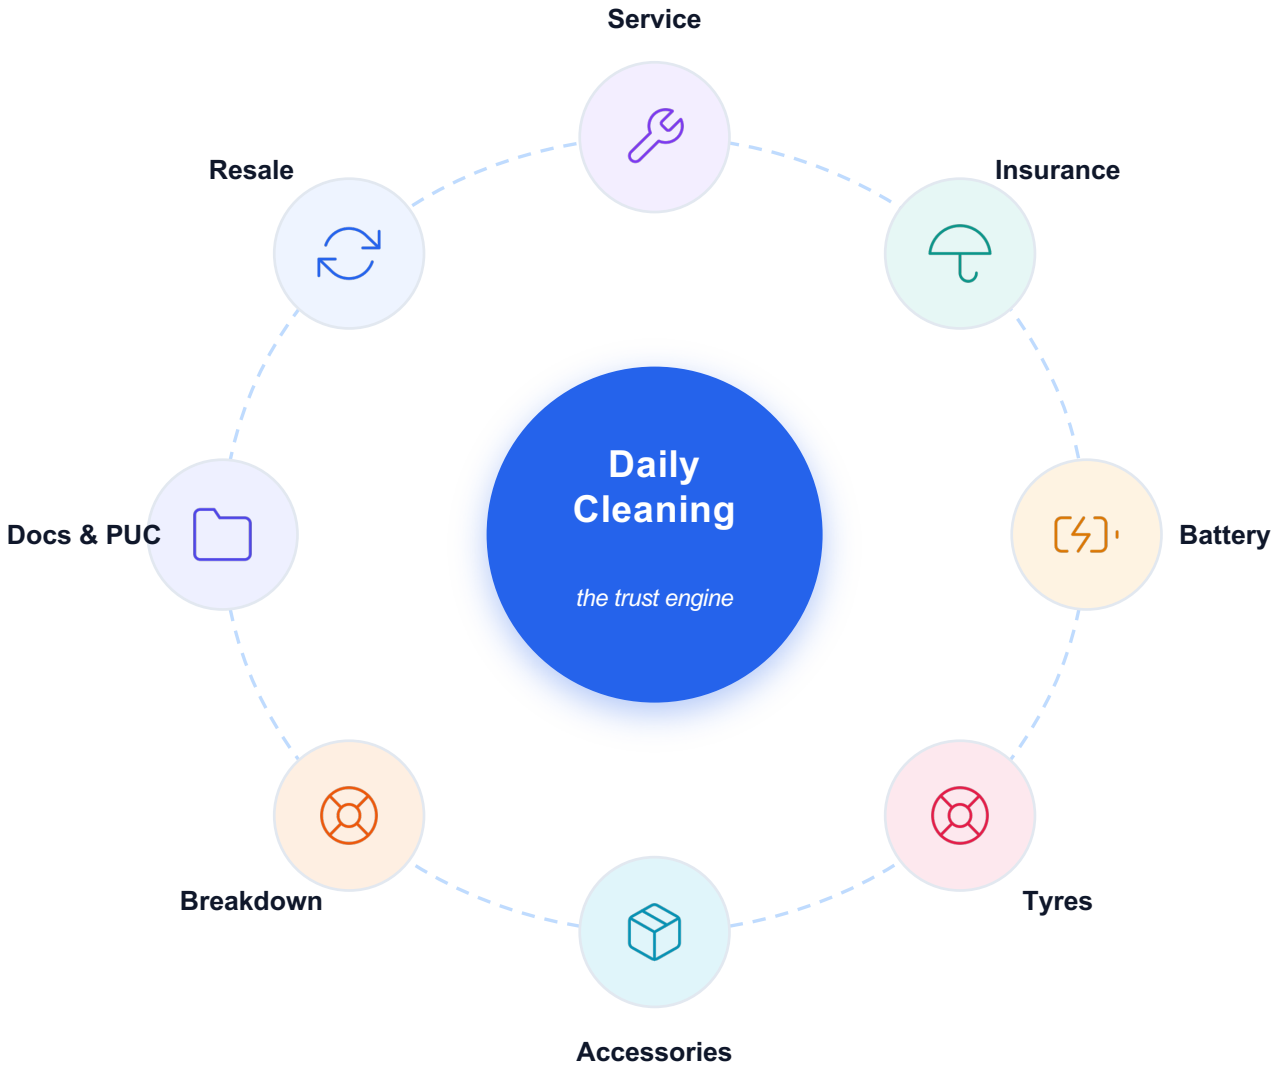

Cleaning is the entry point — not the destination.

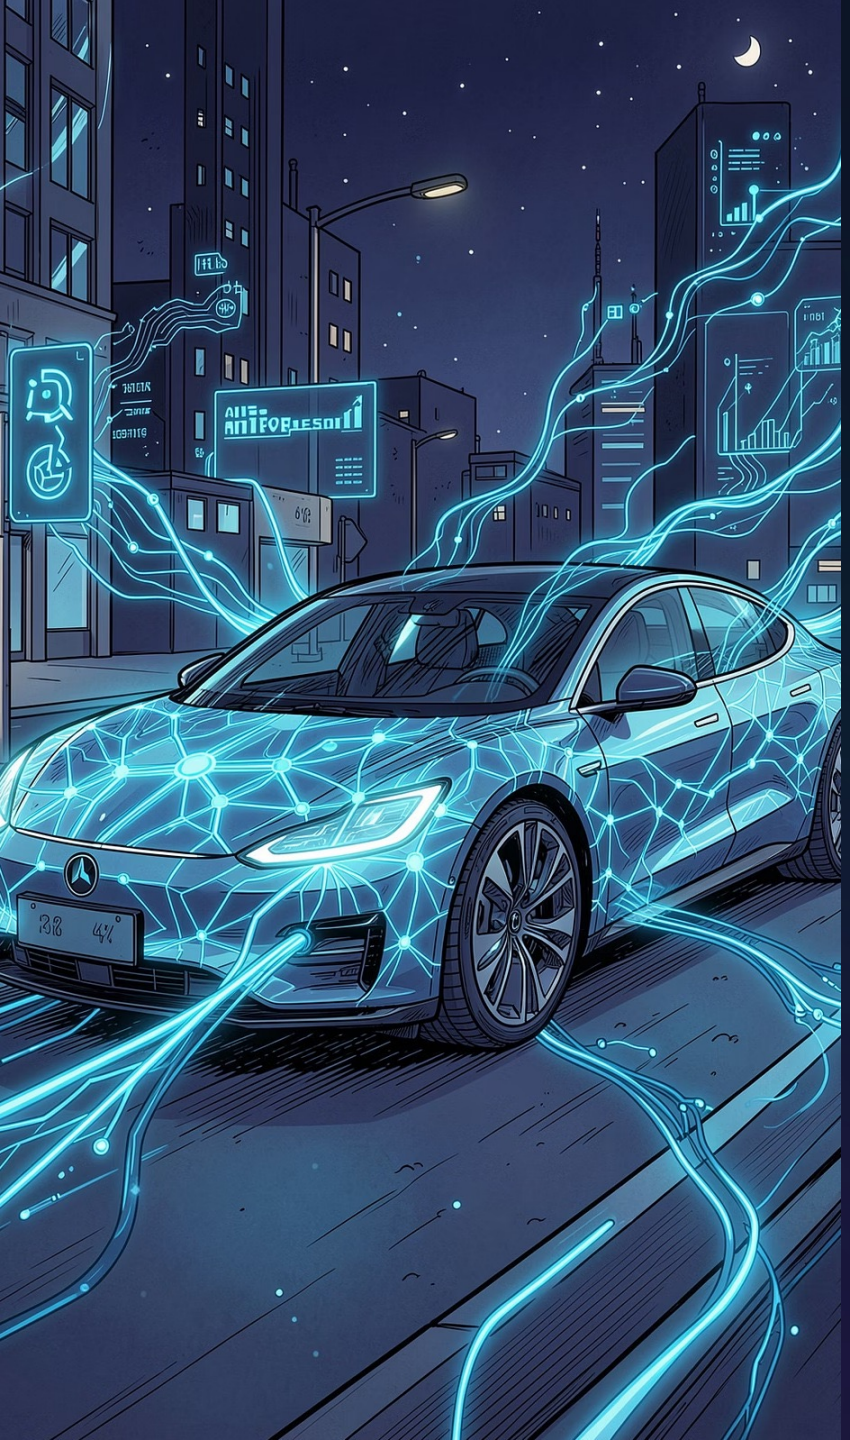

THE PLATFORM

From one service to every service.

Daily cleaning sits at the core, generating trust and daily presence. Around it, Car Concierge expands into every ownership service — one platform, one identity, one relationship.

Each new service deepens engagement and increases lifetime value — a flywheel that compounds over the full ownership journey.

THE INTELLIGENCE

An AI that knows your car better than you do.

Every wash, service and claim becomes data — and data becomes foresight.

Predictive maintenance

Flags issues before they become breakdowns.

Insurance reminders

Renewals handled before they lapse.

Battery health

Real-time monitoring, replaced right on time.

Tyre life

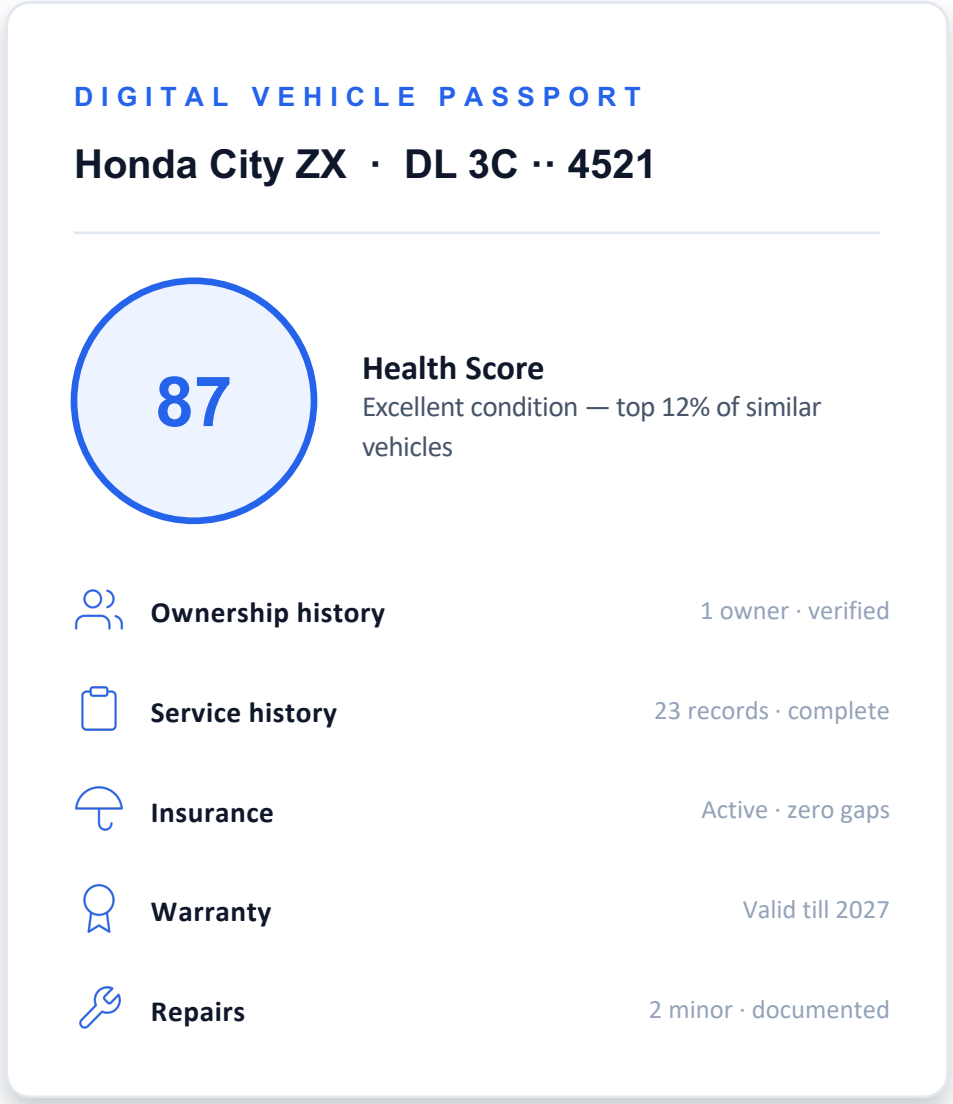

Wear tracked; new tyres before the monsoon.

Vehicle valuation

A live resale price, powered by verified data.

Personal recommendations

Advice tuned to your car and how you drive.

THE ASSET

The Digital Vehicle Passport

Every Car Concierge vehicle carries a verified, tamper-proof record — every wash, service, claim and repair, from first day to final sale.

Verified record → **Buyer confidence** → **Higher resale value**

A used car with a passport isn't a used car. *It's a documented asset — and documented assets command a premium.*

THE MODEL

Six ways this becomes a business

Subscription first. Every other stream compounds on the trust it creates.

Subscription

Monthly plans for daily care — the recurring core.

Marketplace

Commissions on services booked through the platform.

Insurance

Distribution and renewals, powered by vehicle data.

Accessories

Curated products, delivered and fitted at your parking spot.

Premium Concierge

White-glove tier: pickup & drop, documentation, everything handled.

Resale

Passport-backed resale with a fee on every transaction.

THE PLAYBOOK

Win one society. Then the next.

Gated societies are the perfect launchpad — hundreds of cars in one parking lot, and word of mouth that travels by lift.

01

Start with one society

Pilot with 100–300 vehicles in a single gated community.

02

Perfect operations

Standardize quality, timing and training until it runs itself.

03

Delight customers

Turn residents into advocates — the WhatsApp group is the ad.

04

Expand, society by society

Repeat the playbook across the city, then the next one.

Depth before breadth. Density is the moat.

THE TIMING

Why now?

Six curves, all bending in the same direction.

Connected cars

Vehicles now generate the data a concierge runs on.

AI

Prediction and personalization are finally affordable.

EV adoption

New ownership habits, new service needs, no incumbents.

Digital payments

Subscriptions are one tap away for every household.

Subscription economy

People now prefer access and outcomes over ownership chores.

Hyperlocal logistics

Doorstep service networks already exist to build on.

THE ASK

What I'm looking for

Not funding.
Conversations.

This deck exists to be challenged. The more holes you can punch in it now, the stronger it gets.

Honest feedback

Especially the uncomfortable kind.

Blind spots

What am I not seeing?

Mentors

People who've built operations-heavy businesses.

Pilot societies

One gated community ready to try this.

Vendor introductions

Service, insurance and parts partners.

Ideas

Sharper angles on any slide in this deck.

One day, when someone buys a car,

they shouldn't have to ask

“Where should I get it serviced?”

They should simply say

“I have a Car Concierge.”

Own the Car. We’ll Handle the Rest.
